

ROTATION POLICY

This policy has been produced to clarify the rotation policy in the advent that a team in the an age group has more than the recommended 24 players on its team selection list.

It is Ivanhoe JFC policy to support our coaches and team managers in any reasonable decisions they make.

It is the responsibility of the allocated team manager to manage the playing list for each round.

At the beginning of the season the team manager shall send an email or make contact with the parent(s) of each player and determine if there are any games and dates where the player will be unavailable.

The roster will be populated so that a player is “rostered off” on his/her requested Sundays.

Once that roster is done then the team manager will use the player list to rotate players using their surname alphabetically.

Once was the team manager gets to the end of the playing list then it will start at the top again. So on and so forth.

At no stage should the coach have any input as to who plays in each round.

This is a fair and reasonable way of managing excessive numbers.
